

Christmas Campaigns 2022–2023

Two consecutive years of seasonal campaign planning and execution — strategy, creative concept and multi-channel content across social, email, PR and experiential activations, for a full-fibre broadband provider.

MY ROLE

Digital Marketing Executive, Oct 2022 – Dec 2023. Led seasonal campaign planning, content creation, social media management and Mailchimp email marketing, and contributed creative concepts and copy across both Christmas campaigns — working alongside the wider marketing, design and PR team to bring each one to life.

2022 — Community Christmas Campaign

Objective. Build brand awareness and trust in target villages ahead of Q1 sales projections, and generate qualified sales leads through a low-commitment, value-led "give back to the community" campaign.

Approach. A community-first campaign built around a prize draw and pop-up activation touring three villages, layered with direct mail, PR and paid and organic social. The idea: engage first on a personal level with a genuine gift, and reconnect for a sales conversation later — rather than leading with the offer.

Execution

- Pop-up activation with a branded prize-draw wheel, lead-capture form and festive photo backdrop, touring three village locations
- A two-part direct mail drop — festive messaging to the full database, plus a village-specific postcard with event details
- An 11-post organic and paid social plan across three weeks (festive wishes, competition entries, village-specific posts), plus six reels
- PR outreach for local press coverage in each village post-activation
- Dedicated data-capture landing pages for the prize draw and lead form, with a signed-off photo release process for use of activation imagery

2023 — "Full Fibre Christmas" Content Campaign

Objective. Educate and convert customers through a fully integrated, nearly all-channel content calendar, anchored around three core value propositions — price, speed and reliability — plus a branded festive game as a gamified engagement mechanic.

Approach. Built a cohesive "Santa's sleigh" creative universe woven across TikTok, Instagram, Facebook, YouTube, LinkedIn, email and blog. Each value proposition (price, speed, reliability) was given dedicated creative and copy per format, adapting tone from punchy and emoji-led on Instagram/Facebook to a more professional register for LinkedIn.

Execution

- Wrote and designed five Mailchimp email campaigns: a price-led offer (900 Mbps for £49.99), a speed-focused email, a reliability-focused email, a launch email for the "Samurai Santa" browser game, and a Santa-visit registration email

- Produced matching Instagram and Facebook creative and copy for each value proposition, plus dedicated game-launch posts
- Wrote LinkedIn content pivoting tone for a professional audience, including community and charity-focused posts
- Contributed to TikTok and YouTube concept development, including a "Santa on Tour" behind-the-scenes format and a public-reaction piece around a local light show
- Researched and pitched ideation for future activations, including a virtual "North Pole" live Santa concept

SKILLS DEMONSTRATED

Seasonal campaign planning • Email marketing (Mailchimp) • Social media content & copywriting • Multi-channel content calendars • Creative concept development • Direct mail & PR coordination • Cross-team collaboration • Landing page & lead-capture planning

Case study prepared for portfolio purposes. Some materials referenced here — email designs, social creative and the "Samurai Santa" game — are shown separately alongside this document.
